

CLAIM AMENDMENTS

Claims 1-6 (canceled)

Claim 7 (currently amended): The zone of protection of claim 6 ~~11~~ wherein the rows of fibreglass are fastened directly to conventionally spaced studs without the use of battens behind the rearmost row.

Claims 8-9 (canceled)

Claim 10 (previously presented): The zone of protection of claim 13 wherein UL listed sheets of Levels 1, 2, and 3 are employed in the construction of the protection zone wall, with the Level 3 sheets being innermost.

Claim 11 (previously presented): A ballistic resistant zone of protection wall having a resistant level of any of UL Levels 4, 5, and 8, consisting of a plurality of rows of laterally adjacent abutted sheets of UL listed ballistic fibreglass, each of which sheets of fibreglass has a UL listing of any of UL Level 1, Level 2, and Level 3, wherein the laterally abutted sheets of fibreglass from any one row are laterally spaced from the abutments of the sheets of the next forward or next rearward row of latterly adjacent abutted fibreglass sheets;

said rows of sheets being fastened together solely by fasteners passing through all of the rows of the plurality of rows of ballistic fibreglass.

Claim 12 (currently amended): The ballistic zone of protection wall of claim 11 further including ~~drywall~~ gypsum board on at least one side of the ballistic zone of protection wall.

Claim 13 (currently amended): A ballistic resistant zone of protection wall having a resistant level of any of UL Levels 4, 5, and 8, consisting of a plurality of rows of laterally adjacent abutted sheets of UL listed ballistic fibreglass, each of which sheets of fibreglass has a UL listing of any of UL Level 1, Level 2, and Level 3, wherein the laterally abutted sheets of fibreglass from any one row are laterally spaced from the abutments of the sheets of the next forward or next rearward row of latterly adjacent abutted fibreglass sheets;

said rows of sheets being fastened together solely by fasteners passing through all of the rows of the plurality of rows of ballistic fibreglass,

~~said rows of sheets being fastened together solely by fasteners passing through all of the rows of the plurality of rows of ballistic fibreglass;~~

and wherein the rows of fibreglass are formed of sheets having at least any two of the three levels of UL level 1, 2, and 3 ballistic protection,

and wherein the highest level of protection sheet(s) are disposed as the innermost level(s) of each row of sheets of fibreglass forming the protection zone.
